

## Budget Maestro® for SYSPRO

### Overview

To provide a complete application that streamlines the budgeting, forecasting, and financial reporting process and offers rock-solid financial analysis enabling organizations to make better decisions for tomorrow with more accuracy. Link Maestro™ for SYSPRO is included to provide direct connectivity to SYSPRO facilitating the automatic exchange of financial information from SYSPRO into Budget Maestro.

### The Value of Budget Maestro for SYSPRO

- Supports the full cycle of budget development, comparing actual results to plan, re-forecasting, contingency and what-if scenarios
- Includes Revenue and Expense Forecasting, Cash Flow and Financing Projections, Payroll and Fixed Asset Planning
- Unlimited financial and management report generation
- Built-in financial intelligence and business rules – generates accurate calculations and GAAP-compliant reporting
- Enable budget accountability from operational managers
- No formulas or macros to create ensuring 100% accurate calculations
- Align operations and strategy, to deliver accurate and timely financial information and monitor progress toward goals
- Integrated, synchronized P&L, Balance Sheet and Cash Flow statements ensures accurate and precise reporting
- Know exactly how much cash you need to support growth
- Little IT support required
- Implement quickly and with low total cost of ownership

### Matching Budget Maestro to your business

- Use your existing SYSPRO account structure to model your business enabling accurate actual vs. plan analysis
- Data import of accounts and balances for actual vs. budget analysis
- Budget at the right level of detail whether that be very granular or summary consolidated levels
- Option for activity-based budgeting “below the G/L” for example: detailed payroll planning by personnel or position
- Ability to globally define payroll tax rates, fringe benefits and other salary related expenses
- Built-in depreciation schedules for forecasting depreciation on planned capital acquisitions

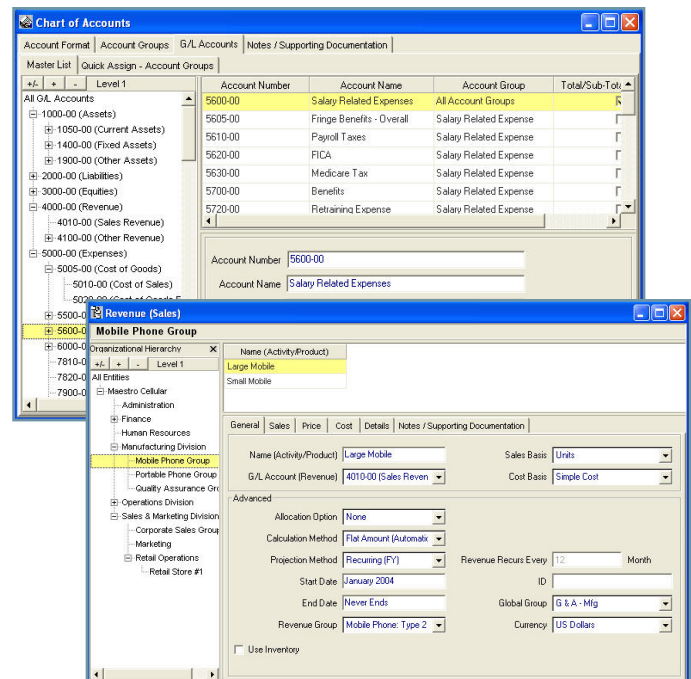

- Easily determine variances and trends and make changes in line with goals and forecasts.
- Drill down to the transaction level to see underlying causes and better exploit opportunities or correct problems.
- Examine your operation from numerous perspectives – by G/L account, manager, category, product lines, customer or any entity
- Export budgets for import into SYSPRO to leverage existing reports and dashboards

### Financial and Management Reporting

- Standard financial statement
- Dynamic drill-down reports
- Ad-hoc reports

### Integration

- Budget Maestro integrates with SYSPRO General Ledger

### Optional modules:

#### Manufacturing Module

The Manufacturing module consists of:

##### ■ **Inventory Planning:**

Measure and manage the impact of inventory costs on the Balance Sheet and Cash Flow Statements by more accurately projecting inventory (finished goods and / or components) based on calculated or user-defined requirements.

- Tracks BOM, purchases, sales and EOM on a month basis
- Accurately reflect your inventory expenses and purchases on financial statements

##### ■ **Component Costing:**

Enables you to more accurately track and control the change in costs on finished goods and components to measure the impact on your bottom line.

- Forecast detailed revenue based on multiple expense items related to a finished good or service
- Build in any price adjustment to help analyze the elements driving costs
- Set up payment schedules for a more accurate view of payables

The Inventory Planning and Component Costing features can be used separately or in conjunction with each other.

#### Revenue Recognition

The Revenue Recognition module automates the complex series of calculations required to forecast deferred revenue and stay in compliance.

- Forecast deferred revenue by contract type
- Define the recognition, payment schedules and the length of the term
- Apportioned revenue is recognized in the appropriate period on the income statement with the balance reflected as a liability
- Results in synchronized and precise P&L, Balance Sheet and Cash flow statements that accurately reflect the impact of deferred revenue schedules

#### Multi-Currency

Enables multinational companies to budget and forecast in multiple currencies and perform currency conversions for any number of denominations.

- Collect operational forecast from multiple divisions or subsidiaries in their local currencies and convert into a single reporting currency
- Set default currencies for subsidiaries to enable budgeting and reporting in their currencies
- Calculates exchange rates based on entered data
- Modify exchange rates on a monthly basis by version and generate reports based upon those versions to analyze variances
- Run Income Statement using an average monthly exchange rate and a Balance Sheet using an end of month exchange rate

#### Extended Period Pack

Provides the ability to forecast up to 15 years (on a monthly basis) and maintain up to 5 years of historical data.

#### Dashboard Kit

Get a snapshot view of key performance indicators essential to measuring the financial and operational health of the organization.

- Report, compare and analyze multiple versions: actuals, budget, forecast, reforecast
- Report, compare and analyze by multiple entities: product lines, projects, profit centers, cost centers, channels, regions, divisions, multiple companies, consolidated view
- Allow decision makers to react quickly to business dynamics
- Ensure greater accountability.
